Claims 20-32 are currently pending. Claim 32 is hereby canceled. Claims 20, 24, and 28 and are hereby amended. No new matter has been introduced. Support for this amendment is provided throughout the Specification as originally filed.

Changes to the claims are not made for the purpose of patentability within the meaning of 35 U.S.C. §101, §102, §103, or §112. Rather, these changes are made simply for clarification and to round out the scope of protection to which Applicants are entitled.

PROPOSED EXAMINER'S AMENDMENT

Listing of Claims:

1. - 19. (Canceled)

20. (Currently Amended) An information acquiring apparatus comprising:

a memory storing a database, the database having updatable content containing
information relating to a media, searchable by key data generated as a function of information
stored at a predetermined place of said media, said content including an address of a server
relating to the media;

means for reading the key data from the media;

means for accessing, through the Internet, the server based on the address of the server
retrieved from the database ~~from a search by~~, wherein the database is retrieved based on the key
data;

MAY 09 2008

means for obtaining from the server, through the Internet, an address of a website relating to the media, said website address being different than said server address;

means for inquiring of a user whether to execute accessing the website;

means for accessing, through the Internet, the website at the address of the website obtained from the server based on a result of the inquiry; and

means for updating said content of the database at any time through the Internet by connecting said database to said address of the website obtained from the server;

wherein a user selects a location of another database having said updatable content searchable by said key data, said another database being different from said database included in said information acquiring apparatus, wherein said another database is retrieved based on the key data.

21. (Previously Presented) The information acquiring apparatus according to claim 20, further comprising means for inquiring a user, before obtaining the address of the website, whether an access to the server is acceptable.

22. (Previously Presented) The information acquiring apparatus according to claim 20, wherein said key data is generated by calculating a portion of index data of said media in a predetermined manner.

23. (Previously Presented) The information acquiring apparatus according to claim 20, wherein the website provides a service so that a user can directly purchase another media or goods relating to the media via the website.

24. (Currently Amended) An information acquiring method comprising the steps of:

providing a database, having updatable content containing information relating to a media, searchable by key data generated as a function of information stored at a predetermined place of said media, said content including an address of a server relating to the media;

reading the key data from the media;

accessing, through the Internet, the server based on the address of the server retrieved from the database ~~from a search by~~, wherein the database is retrieved based on the key data;

obtaining from the server, through the internet, an address of a website relating to the media, said website address being different than said server address;

inquiring of a user whether to execute accessing the website;

accessing, through the Internet, the website at the address obtained from the server based on a result of the inquiry; and

updating said content of the database at any time through the Internet by connecting said database to said address of the website obtained from the server;

selecting a location of another database having said updatable content searchable by said key data, said another database being different from said database, wherein said another database is retrieved based on the key data.

25. (Previously Presented) The information acquiring method according to claim 24, further comprising the step of inquiring a user whether the access to the server is acceptable before connecting the server.

26. (Previously Presented) The information acquiring method according to claim 24, wherein said key data is generated by calculating a portion of index data of said media in a predetermined manner.

27. (Previously Presented) The information acquiring method according to claim 24, wherein the website provides a service so that a user can directly purchase another media or goods relating to the media via the website.

28. (Currently Amended) A computer-readable medium memory storing a program to be executed in a computer, the program comprising instructions for updating content of a database, said content containing information relating to a media, searchable by key data generated as a function of information stored at a predetermined place of said media, said content including an address of a server relating to the media, said instructions being executable for performing the steps of:

reading the key data from the media;
accessing, through the internet, the server based on the address of the server retrieved from the database ~~from a search by~~, wherein the database is retrieved based on the key data;
obtaining from the server, through the internet, an address of a website relating to the media, said website address being different than said server address;
inquiring of a user whether to execute accessing the website;
accessing, through the internet, the website at the address obtained from the server based on a result of the inquiry; and

MAY 09 2008

updating said content of the database at any time through the internet by connecting said database to said address of the website obtained from the server;

selecting a location of another database having said updatable content searchable by said key data, said another database being different from said database, wherein said another database is retrieved based on the key data.

29. (Previously Presented) The computer readable medium according to claim 28, further comprising the step of inquiring a user whether the access to the server is acceptable before connecting the server.

30. (Previously Presented) The computer readable medium according to claim 28, wherein said key data is generated by calculating a portion of index data of said media in a predetermined manner.

31. (Previously Presented) The computer readable medium according to claim 28, wherein the website provides a service so that a user can directly purchase another media or goods relating to the media via the website.

32. (Canceled)
